

POST MORTEM
REPORT

FORM NO. PM-5372

REPORT NO: PM-742 / 2026
P.S.: Sector 12 Police Station
INQUEST: 37 / 2026
DATE: 16 / 09 / 2026

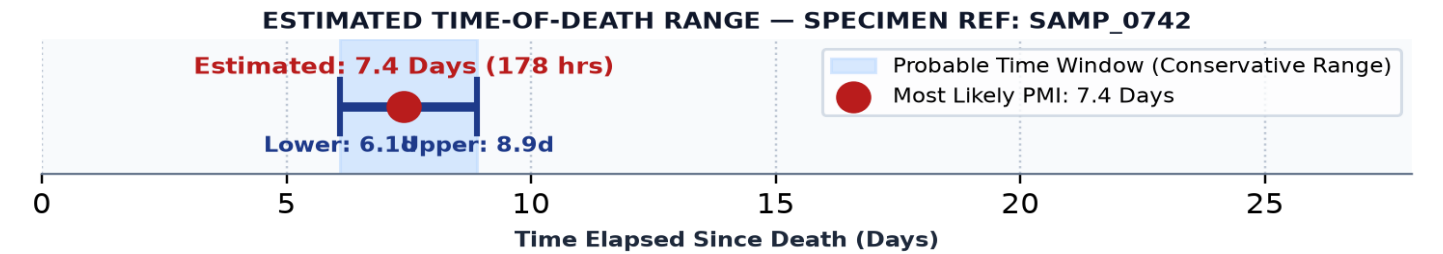

NAME OF INSTITUTION	P.M. REPORT NO. & DATE	CONDUCTED BY (MEDICAL OFFICER)	DATE & TIME OF RECEIPT OF BODY	DATE & TIME OF COMMENCEMENT	TIME OF COMPLETION OF AUTOPSY	INQUEST EXAM TIME (BY POLICE)
District Medico-Legal Center & Forensic Morgue	PM-742 / 2026 16 / 09 / 2026	Dr. Priya Mehta, M.D. (Forensic Medicine) Reg. No. W BMC/45826	16/09/2026, 07:45 hrs	16/09/2026, 08:55 hrs	16/09/2026, 10:30 hrs	16/09/2026, 06:30 hrs

CASE PARTICULARS & IDENTIFICATION					
Name of Deceased:	Rajiv Sharma	Age (Approx):	42 Years	Sex:	Male
S/O, D/O, W/O:	Suresh Sharma (Father)	Residential Address:	14B, Railway Colony, Sector 12	Station:	Sector 12 Police Station
Body Brought By:	SI K. Verma, Sector 12 P.S.	Identified By:	Identified by father at scene; confirmed by Aadhaar document	Challan No:	CH-892/26

SCHEDULE OF OBSERVATIONS (PHYSICAL & POST-MORTEM CHANGES)					
1. Height & Weight:	Height: 169 cm Weight: 71 kg	2. Physique:	Moderately built, adequately nourished	3. Clothes & Belongings:	Dark blue cotton shirt, grey trousers; shoes present
4. Identification Marks:	Surgical scar (appendectomy); mole on right cheek	5. Rigor Mortis Status:	Rigor mortis completely resolved; flaccid throughout.	6. Scene Ambient Temp:	27.2°C (ADD: 201.3)
7. Postmortem Changes & Decomposition:	Stage: Bloat / Active Putrefaction. Moderate abdominal distension with gas accumulation; Greenish-black discoloration over abdomen and flanks; superficial venous marbling on anterior chest wall.	Natural Orifices:	Corneas hazy, collapsed. Purge fluid at mouth & nose.	Hypostasis:	Indistinct due to hemolysis and discoloration.

MICROBIAL SUCCESSION ANALYSIS (POST-MORTEM BIOLOGICAL CLOCK)			
Swab Specimen:	Oral Cavity & Rectal Swab (Specimen Ref: SAMP_0742)	Specimen Adequacy (DNA Yield):	SATISFACTORY — High DNA Recovery (31,850 bacterial reads verified; test fully valid)
Biological Profile:	Active Putrefactive Flora	Laboratory Specimen Barcode:	NT-LAB-0742 (Evidence Seal Intact)
Microbial Examination Finding:	Putrefactive bacteria predominant. Biological succession pattern confirms active internal decomposition, gas production, and tissue liquefaction.	Analytical Method:	Metagenomic Necrobiome Clock (Quantitative Succession Profiling)

OPINION AS TO TIME AND CAUSE OF DEATH			
1. PROBABLE TIME SINCE DEATH:	7.4 DAYS (approx. 178 Hours prior to examination) PROBABLE FORENSIC WINDOW: 6.1 to 8.9 DAYS prior to discovery. ESTIMATED CALENDAR RANGE OF DEATH: 07/09/2026 to 09/09/2026 (Most Likely: 08/09/2026)	Basis of Timing:	Based on integrated clinical autopsy evaluation (rigor mortis state, putrefactive bloat and marbling) concordant with calibrated microbial succession bioindicator sequencing under prevailing scene temperature.
2. CAUSE OF DEATH:	BLUNT FORCE CRANIO-CEREBRAL TRAUMA CONSISTENT WITH HIGH-VELOCITY IMPACT (PENDING TOXICOLOGY & HISTOLOGY).	3. MANNER:	Homicidal — under active judicial inquest.

SPECIMENS COLLECTED & HANDED OVER TO POLICE			
Viscera Preserved:	Stomach with contents, portion of liver, kidney, blood sample for chemical analysis.	Microbial Swabs:	Two sterile oral/nasal swabs preserved for metagenomic DNA reference.

Clothes / Articles:	Personal garments sealed in labeled packet.	Sample of Seal:	Distinctive seal impression affixed below.
